This is to confirm, that our company use several DeepSea Diving Helmets from the Swiss Manufacturer COMPOSITE - Beat Engel.

NORDSEETAUCHER GmbH, International Underwater Contractor, use this helmets in nuclear power plants as well as in deep tunnel constructions since 2002.

We are fully satisfied with the quality and work comfort of these helmets as well as the technical support of the manufacturer.

We firmly believe, that the Composite DeepSea Diving Helmets are a very good alternative towards the existing products on the market.

Kind regards
NORDSEETAUCHER GmbH

Claus Mayer
Managing Director
